

## 6V, 12V or 24V Low Voltage DC Lamp 25watt

**More: 15W, 20W, 23W**

* Model No: AT-25W
* Rated Voltage:6V , 12V or 24V DC
* Rated wattage: 25W
* Luminous Flux (Lm): 1400
* Color temperature: 2700K, 6400K
* Lamp base: E27, b22 ,E26 , E14
* Safety Standard: CE , RoHS
* Life span: 8,000 hours

CFL lamps provide very high illumination levels with an 80% savings in power consumption over incandescent lamps. These high quality DC lamps are designed for use in 6 volt, 12 volt and 24 volt battery systems Solar power systems.

We designed and recently improved the electronic ballast of the 12V DC Compact Fluorescent Lamp (CFL). Preheating, flicker free operation, high electronic efficiency and low thermal losses increase the lifetime of the CFL to more than 10,000 on / off switching cycles.

Cool-white 6400°K lamps provide a bright blue-white glow. Warm-white 2700°K lamps provide a light similar to incandescent lamps.

### Features

- \* 6V, 12V or 24V DC Operation
- \* Extremely high illumination efficiency
- \* High number of switching cycles
- \* Pre-heat start, Polarity protection
- \* Low temperature and Low voltage start,
- \* Easy Installation Using Existing Socket
