

12V DC Low Voltage Compact Fluorescent Lamps:

CFL lamps provide very high illumination levels with an 80% savings in power consumption over incandescent lamps. These high quality DC lamps are designed to be used in 12 volt and 24 volt battery systems Solar power systems and other 12V setups.

The life span of the lamp is more than 8,000 hours. A special electronic circuit guarantees an extremely high number of switching cycles. Cool-white 6400°K lamps provide a bright blue-white glow. Warm-white 2700°K lamps provide a light similar to incandescent lamps

Features

- Preheating, high electronic efficiency. Polarity Protection
- Saves up to 80 % of energy compared to an incandescent bulb
- Extremely high number of switching cycles
- Easy to install by E27/Edison Socket or bayonet socket (B22)
- Low temperature and low voltage start
- Extremely high illumination efficiency
- Compact & robust product design

Certificates & Approvals:

12V DC Compact Fluorescent Lamp (CFLs) Bulb Series

DC Solar Bulb - 5W

DC Solar Bulb - 7W

DC Light Bulb - 9W
